“Some years you win, some years you build character”

- Steve Jobs

JOKE OF THE WEEK

Why did the router and modem fall in love?

They had a great connection.

Word of the Week

Word: Overwhelmed

Definition: when everything feels too big and too much

Word: Flustered

Definition: nervous and unable to think clearly

Monday 9th February 2026

Safer Internet Day

Everyone's talking about Artificial Intelligence (AI), and with many children and young people increasingly hearing about it and using AI-powered tools online, it's more important than ever to have the skills, knowledge, and confidence to make safe and informed choices when using smart technology. AI is already part of everyday life, from search engines and social media to gaming, homework tools, and creative apps, and understanding how it works can help people use it more positively and responsibly.

This Safer Internet Day (Tuesday 10th February 2026), we are exploring the impact of AI on all of our lives. We will be looking at the many ways AI can be used for good, including learning, creativity, accessibility, and online safety, while also discussing some of the challenges and risks that can come with new technologies. By sharing clear advice and practical guidance, we aim to empower children, young people, and families to use AI safely, thoughtfully, and responsibly, helping everyone to feel more confident navigating the digital world.
